Preface

The White House grounds and gardens are a living monument. The landscape character has evolved through many administrations, covering a span of more than 200 years. These grounds and gardens change with the seasons and are continually improved by human hands.

It is, therefore, important to document for future generations one of the most famous gardens in the world. This booklet records for posterity the image of the White House grounds during the term of the Clinton administration, 1992 to 1996. It supplements previous volumes published for 1976–1980, 1980–1984, 1984–1988, and 1988–1992.

The White House Grounds

1992-1996

Digitized by Google

North Panel

1993 A March ice storm destroyed a cockspur hawthorn and severely damaged a Washington hawthorn on the east bank of the tradesman's entrance. *Section 4 / Trees 28, 29*

A white ash lost a large limb section on the east side of the tree in a violent spring rainstorm in early May. *Section 4 / Tree 8*

The azalea planting on the east side of the West Wing visitor's entrance was removed during construction activities. In July the area was replanted with 'Girard's Rose' evergreen azaleas, providing a midseason bloom. *Section 2 / Shrub 10*

A fern-leaf beech on the east bank of section 4 planted in 1991 died during the summer. Beech trees are very sensitive to transplant shock, and this tree never recovered from the move. A new fern-leaf beech from Princeton Nursery was planted in November and is thriving. *Section 4 / Tree 15*

1994 Two American elms were removed in September. A hybrid elm in section 1 died from Dutch elm disease; this tree was from early breeding programs and had limited resistance. The second elm was removed because of leaf scorch decline. *Section 1 / Tree 4; Section 4 / Tree 14*

Three Washington hawthorns on the east bank of the tradesman's entrance were removed because of fire blight and senescence. They were replaced with 'Winter King' hawthorn, an improved native selection. *Section 4 / Trees 21, 22, 23*

A long-range renovation of the Truman boxwood planting was begun in December. The key elements of the original design had become overgrown. The curator of boxwoods at the National Arboretum developed a pruning regimen to gradually bring the planting back to the desired height and contours, as well as to preserve the aesthetic appeal and health of the planting. *Section 3 / Shrubs 6, 7*

1995 A star magnolia planted on the east bank of the tradesman's entrance snapped in a spring ice storm. This tree was one of a group planted in 1952. *Section 4 / Tree 27*

Several sections of small-leaved Japanese holly hedging were replaced in July and again in October. These shrubs had been damaged the previous winter and continued to decline during the subsequent growing season. *Section 4 / Shrub 11*

Approximately 25 mixed Glenn Dale azalea varieties were planted to replace declining plants in the azalea bed on the east bank of the tradesman's entrance in October. All the additions were selected to match the original design. *Section 4 / Shrub 8*

1996 A large European linden on the east side of the fountain was destroyed by a thunderstorm in late June. A sister tree of the same size that came down in 1992 had a ring count of 152 years. This tree was hollow but was presumed to be of the same age. *Section 3 / Tree 10*

A hybrid American elm that died in September from Dutch elm disease was removed. It was an early hybrid and had limited resistance to disease. *Section 2 / Tree 14*

Middle Panel

1993 A large limb in the southern magnolia grouping on the east side of the south portico was sheared off in a storm on March 4. The grape arbor and the adjacent plantings of holly, osmanthus, and elaeagnus were destroyed. This arbor structure had been rebuilt during the Carter administration. *Section 6 / Shrubs 6, 9, 35*

On March 13 strong wind broke two limbs on the Jackson magnolias. The main sections of the two trees were not damaged. *Section 7 / Trees 1, 2*

In June the White House carpenters rebuilt the grape arbor. The redwood sections were from California, and the pine columns from Georgia. 'Nellie R. Stevens' hollies from the nursery were planted in April, with additional hollies to finish the planting in June. *Section 6 / Shrub 9*

Several Japanese hollies in the pool area were removed, having suffered winter damage. 'Glacier' Glenn Dale azaleas were planted in their place in June. *Section 8 / Shrub 25*

A very old, hollow purple beech planted before 1900 was removed during July. A section of a lower limb had rooted, and this portion was left. This tree had been a companion to a nearby purple beech of approximately the same age that was removed in 1991. *Section 9 / Tree 7*

The osmanthus hedge behind the Rose Garden patio was removed during construction in July. This area and the adjacent patio hedge were replanted with young osmanthus in December. The severe winter damaged these two areas so badly that both had to be replanted in April 1995. *Section 7 / Shrub 6*

A *Franklinia* tree was removed in September after having declined for a number of years. A fungal dieback is the primary cause of death in these trees, limiting the use of this beautiful native tree in the landscape. *Section 10 / Tree 29*

A thunderstorm on September 27 uprooted the small-leaved linden by the walk to the Oval Office. This tree had been planted in 1937 at the same time that the coronation planting commission planted linden trees to commemorate the coronation of King George VI. This tree was not commemorative. President and Mrs. Clinton planted a new small-leaved linden on October 10 to replace the lost tree. The replacement was selected from Robin Hill Nursery in Maryland. *Section 8 / Tree 11*

Three large boxwoods along the east walk were replanted with American boxwood on October 30. These are considered hardier than the English type boxwoods they replaced. *Section 5 / Shrub 3*

Digitized by Google

A native American beech was planted in November on the east knoll. The remaining rooted limb section of the purple beech was removed to give the young tree complete growth opportunity without competition. *Section 9 / Tree 7*

1994 A key English boxwood by the Rose Garden patio died during the winter of 1993. A specimen boxwood of the same size was installed in mid-May. *Section 7 / Shrub 7*

Three pink dogwoods in the southeast triangle that were in decline from dogwood Discula blight were removed in early May. Hillary Rodham Clinton planted three 'Cherokee Princess' white flowering dogwoods on May 26. This commemorative planting was done in conjunction with the Women's National Democratic Club. *Section 8 / Trees 22, 23, 24*

The osmanthus hedge along the south side of the Jacqueline Kennedy Garden was replaced in late May and early June. The winter damage in this area was severe. *Section 6 / Shrub 6*

A Cessna 150 two-seat plane piloted by Frank E. Corder crashed on the south lawn at approximately 1:45 A.M. on September 12. The plane bounced from the lawn, over the roadway, and crashed through the osmanthus hedge. The Jackson magnolia was slightly damaged, and the rear osmanthus hedge suffered some damage. A 19th century fern motif cast-iron garden bench was destroyed by the impact. *Section 7 / Tree 2, Shrub 6*

Three evergreen 'Emily Brunner' hollies were planted on the east side of the Jacqueline Kennedy Garden in late November to provide background during the winter months. *Section 6 / Shrubs 42, 43, 44*

A hybrid flowering dogwood, 'Ruth Ellen,' was planted near the southeast bench in the east garden. This white flowering cultivar is resistant to borers and dogwood blight. It blooms one week later than the nonhybrid white dogwood. *Section 6 / Tree 23*

The Washington hawthorn by the Rose Garden patio, which had died from bacterial fire blight and senescence, was removed in November. This tree was the original tree from the 1962 planting. A specimen 'Winter King' hawthorn, an improved native selection supplied by Princeton Nursery, was planted on November 15. *Section 7 / Tree 5*

In the corner of the linden walk in the Jacqueline Kennedy Garden a white flowering 'Snowcloud' crab apple was planted to replace the 'Striped Beauty' crab apple dating from the original design. 'Striped Beauty' is no longer in production in this country. *Section 6 / Tree 14*

1995 The southern magnolia on the east side of the south portico lost the top of its trunk in a wind storm on January 15. The falling limbs broke several panes of glass in the East Room window; no other damage was sustained. (A limb from this same magnolia destroyed the grape arbor in the east garden in March 1993.) The National Park Service crew removed the trunk the next day. Gude Nursery in Maryland had supplied this tree after the 1952 renovation of the White House. *Section 6 / Tree 1*

In early March the hedges of osmanthus on both ends of the east garden were replaced with young plants. The winter of 1993–94 caused severe damage to broad-leaved evergreens, and many of these hedges did not recover during the subsequent growing season. A week later, the south roadway osmanthus hedges were also replaced with young osmanthus. These had been the original 1962 hedges planted during the Kennedy administration. The new plants were obtained from the Tankard Nursery in Exmore, Virginia. *Section 7 / Shrub 6; Section 6 / Shrub 6*

A grouping of 'Roseum Elegans' rhododendron replaced a grouping of 'Exbury' azaleas in a March renovation of the southeast triangle rhododendron bed. *Section 10 / Shrub 15*

On April 23 President and Mrs. Clinton planted a hybrid white flowering dogwood on the east knoll in memory of those lost in the Oklahoma City bombing tragedy. The tree was planted early in the morning, prior to the Clintons' departure to Oklahoma for memorial services. *Section 9 / Tree 29*

The convex-leaf holly hedging along the linden walk in the east garden was replaced with smaller plants in May. The existing plants were overgrown and out of scale. This planting complemented the renovated brick walk installed earlier. *Section 6 / Shrub 7*

A large section of the Wier silver maple fell during a rainstorm in July. Adjacent trees, a weeping silver linden and a Persian parrotia, suffered damage, and an ambulance parked beneath the trees was dented. This tree dates from before 1900. *Section 9 / Tree 18*

The final sections of osmanthus hedging in the Rose Garden area were replaced in August. This completed the entire hedge renovation on the west side of the portico. *Section 7 / Shrub 6*

1996 The parterre boxwood in the east garden continued to suffer from boxwood decline despite all efforts to ameliorate the problem. The first sections of the edging boxwood were replanted with the boxwood cultivar 'Justin Brouwer' in March, and the south hedges replanted in October. The cross parterres are scheduled for renovation in spring 1997. 'Justin Brouwer' is a new boxwood cultivar that was discovered as a seedling in Williamsburg, Virginia. It has superior resistance to boxwood decline and to many insect pests. The habit is similar to dwarf boxwood, and it is becoming available in nurseries. *Section 6 / Shrub 33*

Several boxwoods that were damaged as a result of the very cold winter in 1995–96 were replaced in April. English boxwoods in the Rose Garden and east front area were replanted with American boxwoods of the same size. *Section 5 / Shrub 3; Section 7 / Shrub 7*

President and Mrs. Clinton planted a flowering dogwood on the southeast knoll in memory of those who lost their lives with Secretary of Commerce Ronald Brown in Croatia. The planting ceremony took place on the morning of April 5. *Section 9 / Tree 28*

Digitized by Google

A southern magnolia on the east bank near the visitor's entrance was removed in May. This tree had been in decline for several years, primarily from winter damage. A Jackson magnolia seedling was planted as a replacement later in the month. The new tree was grown at the White House nursery from seed and is approximately 30 years old. *Section 10 / Tree 20*

The Persian parrotia in the southeast triangle lost a large section during a summer thunderstorm. This section of the tree was hollow and had been declining for several seasons. *Section 10 / Tree 22*

The June 20 thunderstorm that destroyed the European linden on the north panel also blew down a paulownia tree, dating from before 1900. The tree had been hollow for many years. A young paulownia tree was planted in 1989 as a replacement for the older tree. The stump was removed in July. *Section 9 / Tree 14*

A 30-year-old Jackson magnolia seedling from the White House nursery was planted on June 7 to replace the magnolia removed in January 1995. *Section 6 / Tree 1*

The remaining section of osmanthus hedge by the south portico was planted in July. The end sections in the Jacqueline Kennedy Garden were also replaced, completing the renovation of osmanthus on the east side of the portico. *Section 6 / Shrub 2*

A northern red oak by the pool area was removed in July. This tree had begun to die in June, and by July had completely wilted. The tree exhibited vascular streaking, possibly oak wilt. *Section 8 / Tree 12*

A large section of the English elm near the pool crashed in a wind storm on October 19, breaking several fence points. *Section 8 / Tree 14*

The English boxwood at the base of the west staircase of the south portico was replaced in October. The plant had been in decline for several years. The replacement specimen English boxwood was located in Virginia. *Section 7 / Shrub 4*

South Panel

1993 A massive American elm near the tennis court was split by a thunderstorm on May 12. One fallen branch damaged the south side of the Cleveland Japanese maple, requiring removal of almost one third of that tree. The trunk and stump of the elm were removed in July. On October 10 President and Mrs. Clinton planted an American elm to replace the lost tree. This tree, which is from the National Park Service elm-breeding program, is a resistant cultivar named 'Washington' and was grown at the White House nursery. *Section 12 / Tree 2*

In late May five 'Nellie R. Stevens' hollies were added to the southeast gate area to replace rhododendrons removed in 1990. *Section 11 / Shrub 3*

President and Mrs. Clinton planted a willow oak on the southeast side of the fountain on October 10. This tree replaces a scarlet oak removed in 1991. The tree was selected from Robin Hill Nursery in Brandywine, Maryland. *Section 11 / Tree 1*

The areas adjacent to the fountain were planted with a mixture of American and 'Nellie R. Stevens' hollies in December. These shrubs will add winter interest and provide additional screening. A tripartite planting of yews around the south fountain completed the changes to this area. *Sections 11 and 12*

1994 A Chinese redbud that had died during the winter of 1993–94 was removed in May. *Section 12 / Tree 32*

In July a Norway maple planted before 1900 was removed because of the proximity of this large tree to the fence and the poor state of its health. *Section 12 / Tree 17*

Several hollies and viburnums in the perimeter plantings were removed in 1994 and early 1995. The winter damage was the primary cause of the decline, with senescence being a contributing factor in many of these shrubs. *Sections 11 and 12*

1995 Approximately 30 'Roseum Elegans' rhododendron were planted along the east perimeter in May. These replaced old rhododendron that had been removed during the early 1990s. These plants will bloom in May and improve screening. *Section 11 / Shrub 17*

A Japanese threadleaf maple was planted near the Cleveland Japanese maple in June. This tree will provide shade to the damaged side of the Cleveland maple, preventing sunscald. The nurse tree will balance the form of the older tree until the damaged limbs are able to regenerate. *Section 12 / Tree 1*

Two trees near the southeast gate were damaged in a storm on June 12. A golden-rain tree and a horse chestnut lost large sections of limbs. Both trees had been planted before 1900. *Section 11 / Trees 9, 24*

1996 A hybrid flowering dogwood was planted in March where the Chinese redbud had been removed in 1994. This selection blooms one week later than nonhybrid dogwoods. *Section 12 / Tree 32*

The Children's Garden was renovated in April, and hollies and azaleas that had been shaded out by larger trees were replaced. New 'Nellie R. Stevens' hollies and compact laurel were planted in several areas. *Section 12 / Shrubs 38, 115*

1993 Jogging Track

In February a jogging track, consisting of recycled automobile tires, was constructed around the center panel of the south driveway. A section of asphalt 5 feet wide was removed, and the shredded rubber base was installed to create the track. The costs of the material and labor for the project were donated by private contributors.

1994 East Garden Walkways

As a result of increased visitation to the sculpture exhibits, a long-standing plan to replace the gravel walkways in the east garden began in the spring. The section of walk in front of the grape arbor was replaced with White House bricks that had been kilned on the south grounds circa 1795 and had been in storage since their removal during the Truman renovation. The remaining sections of walkways were replaced with a Williamsburg brick of a historically similar form. Private contractors installed the walks.

1995 Restoration of the Eisenhower Putting Green

The Eisenhower putting green, which had been removed during the Nixon administration, was restored in April and May in honor of the United States Golf Association's centennial celebration. The restored green is in the same location as the Eisenhower green, but it is slightly smaller. An artificial putting green constructed nearby in 1991 was removed at the same time. The National Park Service assisted Robert Trent Jones II Company and other USGA members in reestablishing the green. Expenses and services for the project were donated to the National Park Service.

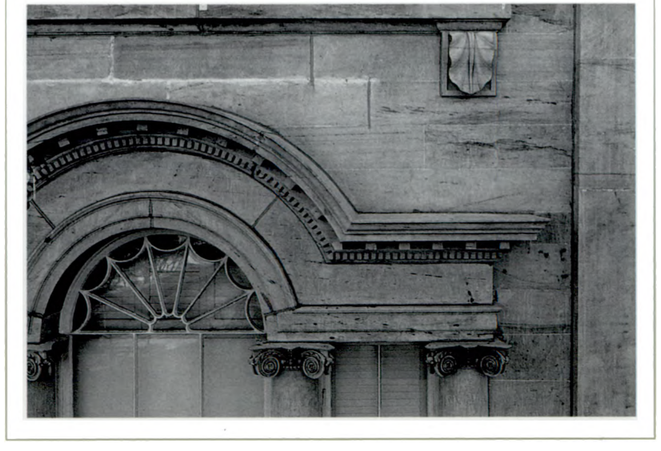
1992–1996 Exterior Restoration of the Executive Residence

The restoration of the Aquia Creek sandstone used in the construction of the White House (1792–1800) was completed in late December 1996. A paint removal process, which was begun in 1980 to reestablish a sound surface for repainting, revealed several categories of deterioration in the historic stonework. The guiding principle for restoration was to retain as much of the historic stonework as possible. Aquia sandstone used in the construction of the United States Capitol, which had been quarried at the same time as the White House stone and had been saved from Capitol renovations, was made available through the Architect of the Capitol, with the concurrence of Congress.

A cadre of highly skilled stone carvers, who had been employed in the decades-long building of the Washington National Cathedral, provided the level of excellence required to complete the renovation. The paint removal and stone restoration revealed the original stonework for the first time in 200 years, inspiring a new appreciation for the design, craftsmanship, and architectural history of the White House. To guide future maintenance and research, a careful record was made of the restoration project. Executive Residence staff at the White House, National Park Service employees, and private contractors performed the work.



Pennsylvania Avenue at the White House

On May 20, 1995, the portion of Pennsylvania Avenue in front of the White House between 15th and 17th Streets was permanently closed to public vehicular traffic by the Department of Treasury for security reasons. On June 6, 1995, Chief of Staff Leon Panetta requested that the National Park Service improve the appearance of this portion of Pennsylvania Avenue. The request included immediate interim beautification efforts and the development of a permanent new design for the closed portion of the avenue.

The National Park Service, in cooperation with other agencies at the site, developed the interim improvements. The improvements included a guardhouse, a vehicular gate, and barrier planters at the 15th Street and 17th Street intersections. The planters contained both evergreens and seasonal plantings. The guardhouses were similar in design to those on the White House grounds. In addition, informational directories for visitors were placed at both intersections. The elements of the interim plan were designed to be removable for the inaugural parade, and this flexibility will be one of the criteria for the permanent design.

Symbol Key

- *Broadleaf Deciduous Trees* — *Elms, oaks, maples, chestnuts, beeches, ashes*
- *Needleleaf Deciduous Trees* — *Bald cypresses*
- *Flowering Trees* — *Crab apples, dogwoods, magnolias*
- *Broadleaf Evergreen Trees* — *Southern magnolias*
- *Small Ornamental Trees* — *Japanese maples, birches*
- *New Tree*
- *New Shrub*
- *Tree Removed*
- *Needleleaf Evergreen Trees/Shrubs* — *Pines, spruces, yews*
- *Large Broadleaf Evergreen Shrubs* — *American, `Nellie R. Stevens' hollies*
- *Deciduous Shrubs* — *Forsythia, spirea, viburnums*
- *Ground Covers* — *English ivy, wintercreeper, annuals*
- ★ *Commemorative planting by a President or First Lady*
- *Grounds and Gardens section dividers*

Note: Symbols used indicate type of plant removed or planted. Shrubs or ground covers that have been removed are not shown. Plant locations are based on original surveys of 1970 and changes updated through 1996.

No.	Common Name	Botanical Name	Date Planted	
2	AMERICAN ELM	*Ulmus americana*	–1900	(Removed 1993)
★2	WASHINGTON AMERICAN ELM	*Ulmus americana 'Washington'*	1993	CLINTON

The reference for botanical names is *Hortus Third: A Concise Dictionary of Plants Cultivated in the United States and Canada* (New York: Macmillan Publishing Co, Inc., 1976).
